# REFERENCE GUIDE

## IP RATINGS:

Ingress Protection (IP) ratings are defined by the international standard EN60529. The ratings are used to define the levels of sealing electrical enclosures against moisture and foreign bodies.

The rating is explained using a two-number system. The first digit defines the level of protection for people coming into contact with moving parts in addition to the level of protection the enclosure provides against foreign bodies.

The second digit defines the protection level the enclosure provides against moisture ingress.

## INTRUSION PROTECTION

(FIRST DIGIT)

<b>0</b>	No Special Protection	<b>3</b>	Protection from entry by tools, wires etc, with a diameter of 2.5mm or more
<b>1</b>	Protection from large body parts such as a hand and solids larger than 50mm in diameter	<b>4</b>	Protection against solid bodies larger than 1.0mm (e.g. fine tools/small)
<b>2</b>	Protection for fingers and other objects not greater than 80mm in length and 12mm in diameter	<b>5</b>	Protection against dust and particles that may harm equipment
		<b>6</b>	Totally dust tight

## MOISTURE PROTECTION

(SECOND DIGIT)

<b>0</b>	No Special Protection	<b>5</b>	Protection against low pressure water jets from all directions
<b>1</b>	Protection against condensation	<b>6</b>	Protection against strong water jets and waves
<b>2</b>	Protection against water droplets deflected up to 15° from vertical	<b>7</b>	Protection against temporary immersion under pressure
<b>3</b>	Protection against water spray up to 60° from vertical	<b>8</b>	Protection against prolonged effects of immersion under pressure
<b>4</b>	Protection against water spray from all directions		

## CIRCUIT BREAKERS EXPLAINED:

### MCB (MINIATURE CIRCUIT BREAKER)

An MCB is one of the most common devices used to safeguard electrical appliances and equipment from potential damage by affording the circuit overload/short circuit protection. MCB's provide a swift restoration of the electrical supply by switching the circuit back on where a fuse would need to be replaced.

### RCD (RESIDUAL CURRENT DEVICE)

A residual current device is a life saving device that protects the user against the risk of electrocution and fire caused by potential earth faults. It will automatically disconnect the circuit should it detect that the electrical circuit is flowing down an unintended path (an imbalance).

### RCBO (RESIDUAL CURRENT CIRCUIT BREAKER WITH OVER CURRENT PROTECTION)

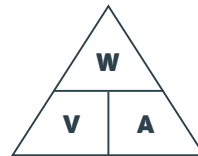

An RCBO provides two main functions and offers a hybrid between an MCB and an RCD device – affording protection of life and protection of circuit overload. The RCBO can sense faults and disconnect the circuit ensuring complete protection of persons and equipment.

### MCCB (MOULDED CASE CIRCUIT BREAKERS)

A moulded case circuit breaker is an electrical protection device that is used in to protect an electrical circuit from excessive current, which can cause overload or short circuits, generally for larger current circuits found in industrial applications. They can also be remotely controlled to allow switching of the circuit. Project Power's Sync Generators use MCCB's for this purpose.

### SV ELR (SWITCHABLE VARIABLE EARTH LEAKAGE RELAY)

A, Earth Leakage Relay (ELR) is used to detect earth leakage current in electrical circuits using intelligent circuit protection. The devices are used to ensure the protection of installation and persons against direct and indirect contact with the circuit. In the event of an insulation fault an ELR will trip the circuit breakers that are fitted with a mechanical shunt to disconnect the circuit in question. Project Power's fleet features SVELR's on Primary Breakers on larger boards, and single circuits on Powerlock Boards/MDU's – these are switchable and are fully configurable in Trip Time and Trip Values depending on your system design.

$$\text{WATTS} = \text{VOLTS} \times \text{AMPS}$$

$$\text{AMPS} = \frac{\text{WATTS}}{\text{VOLTS}}$$

$$\text{VOLTS} = \frac{\text{WATTS}}{\text{AMPS}}$$

# ABOUT US

---

**AT PROJECT POWER** we pride ourselves on our quality of equipment, high level of service and teamwork ethos - all of which is at the heart of what we do. We call this our Delivery Promise.

---

## **WHETHER A CURRENT OR PROSPECTIVE CLIENT,**

you will receive a supportive response backed by our team's in-depth equipment expertise and best practice knowledge. As an SME in the power sector, we strive for excellence in everything we do and we're always there for clients when you need us – day, night or weekend - we're a phone call away.

We operate a true 24/7 callout support service so whether its Generator/Equipment Hire, Emergency Fuel, Emergency Transport/ Logistics Support or Engineering Support you need, we are at the other end of the phone. As we are a growing business we continue to invest in the best equipment available so that we are well-positioned to respond to our client's needs.

We believe in heavily investing in our team members' ongoing development. We do this with training for various equipment, by following new Industry Code of Conduct and Best Practices and by adhering to Legislation and Health and Safety Training. From Hire Controller through to Director and

every role in-between, we want to see our team thrive.

We live and breathe the SME ethos; our team members spend time shadowing each other to get a true understanding of each job role within the business. They even have the opportunity to overlap roles if desired once they have completed the appropriate training. At Project Power, everyone can 'muck in' when required – so you never know when a Company Director may turn up driving one of our Hi-Ab Trucks, or a Hire Controller could undertake one of our Cable and Distribution deliveries!

Our company is a full 360 business. This means we can support clients with the cross-section of services that we offer, whether they need standalone hire or a full install. You're guaranteed the same high level of service throughout your journey with us.

We are proud of Project Power and the company we have built and are continuing to build; you can be assured of a warm welcome, supportive service, and reliable delivery when you ask us to be your power partner.

# GENERATOR RENTAL

We supply a range of portable generator rental options ranging from domestic to large scale commercial use.

<b>RENTAL CODE</b>	GX10p	GX23k	GX37p

# GENERATOR TANKS

We selected Fuel Proof to supply our generator tanks and road towable Bowers as we believe the build quality is of the highest standard. All our tanks are:

- ✔ **PAINTED WITH RAL7016 GREY**
- ✔ **ALL STEEL CONSTRUCTION**
- ✔ **UN APPROVED FOR ROAD TRANSPORTATION**
- ✔ **110% BUNDED - ENVIRONMENT AGENCY PPG2**
- ✔ **SECURE LOCKABLE LID**
- ✔ **ANTI-VANDAL DOOR**
- ✔ **ROTARY FUEL LEVEL GAUGE**
- ✔ **LIFTING EYES AND FORK POCKETS**

<b>CAPACITY</b>	900L	2000L	3000L
<b>DIMENSIONS (LxWxH)</b>	1016 x 1220 x 1362mm	2315 x 1262 x 1300mm	2315 x 1705 x 1300mm
<b>WEIGHT (EMPTY)</b>	440kg	725kg	860kg
<b>WEIGHT (FULL)</b>	1223kg	2425kg	3410kg

# ROADTOW & PORTABLE DIESEL BOWSERS

Our range of Roadtow and Portable diesel bowsers are fitted with 12v pumps and run from the internal battery or external supply via battery clips and are sent with a complete spill kit. The Roadtow bowsers can also be used to feed our generators instead of having separate tanks.

<b>CAPACITY</b>	1000L	2000L	435L DieselMaster
<b>DIMENSIONS (LxWxH)</b>	3175 x 1760 x 1568mm	3838 x 1819 x 1895mm	100 x 750 x 890mm
<b>WEIGHT (EMPTY)</b>	840kg	1235kg	35kg
<b>WEIGHT (FULL)</b>	1590kg	2835kg	470kg

# 32AMP POWER DISTRIBUTION

---

Our distribution stock provides a flexible solution to any temporary event power requirements, available as stand-alone hire or as part of a complete supply package.

## 321HB

- .....
  - › 32amp single phase inlet
  - › 4x 16amp outlet with 30mA RCBO on each
- 

## 323SP

- .....
  - › 32a three phase inlet
  - › 3x 32a outlet with 30mA RCBO on each
- 

## 323H

- .....
  - › 32a three phase inlet with thru
  - › 2x 16a three phase outlet with 30mA RCBO on each
- 

## 32322

- .....
  - › 32a three phase inlet with thru
  - › 2x 16a outlet and 2x 32a with 30mA RCBO on each
- 

## 323M

- .....
- › 32a three phase inlet with thru
- › 6x 16a outlet and 3x 32a with 30mA RCBO on each

# 63AMP POWER DISTRIBUTION

---

## 633SP

.....

- › 63a three phase inlet
- › 3x 63a single phase outlet with 100mA RCBO on

## 633H

.....

- › 63a three phase inlet with overall RCD
- › 3x 32a three phase outlet with MCB on each

## 633H/2

.....

- › 63a three phase inlet
- › 4x 32/3 with SVELR on each

## 633M

.....

- › 63a three phase inlet with thru
- › 6x 16a, 3 x 32a outlets with 30mA RCBO on each
- › 2x 32/3 outlet with RCD / MCB
- › 1x 32/3 outlet with MCB only

## 633L

.....

- › 63a three phase inlet with thru
- › 12x 16a outlet, 6x 32a with 30mA RCBO on each
- › 1x 32/3 outlet with RCD/MCB

# 125AMP POWER DISTRIBUTION

---

## 1253H

.....

- › 125a three phase inlet with SVELR
- › 4x 32/3 outlet with MCB on each
- › 2x 63/3 outlet with MCB on each

## 1253M

.....

- › 125a three phase inlet with SVELR
- › 1x 16a, 3x 32a with 30mA RCBO on each
- › 2x 32/3 with MCB on each
- › 3x 63/1 with 30mA RCBO
- › 2X 63/3 with MCB on each

## 1253L

.....

- › 125a three phase inlet with SVELR
- › 6x 16a, 12x 32a outlets with 30mA RCBO on each
- › 2x 32/3 with RCD / MCB on each
- › 1x 63/3 with MCB

## 1253T

.....

- › 125a three phase inlet and thru with SVELR
- › 18x 16a, 12x 32a outlets with 30mA RCBO on each
- › 3x 32/3 with MCB on each
- › 1x 63/3 with RCBO

# POWERLOCK DISTRIBUTION

---

## PL400

.....

- › 400a Powerlock inlet and thru with overall breaker
- › 4x 125/3 outlets with MCB / SVELR

## PL400M

.....

- › 400a Powerlock inlet with overall breaker
- › 3x 63/3 outlets with MCB / SVELR
- › 2x 125/3 outlets with MCB / SVELR

## PL400L

.....

- › 400a Powerlock inlet with overall breaker
- › 4x 32/3 outlets with fixed RCD (100mA) and MCB
- › 3x 63/3 outlets with MCB / SVELR
- › 2x 125/3 outlets with MCB / SVELR

## PL400T

- › 400a Powerlock Inlet and thru with overall breaker
- › 12x16a, 12x 32a Outlet with RCBO on each
- › 4x 32/3 outlet with MCB
- › 3x 63/3 outlet with MCB / SVELR
- › 2x 125/3 outlet with MCB / SVELR
- › Overall Multifunction Meter

## PL400P

- › 400a Powerlock Inlet
- › 2x 400a Powerlock Out with overall 400a breaker / SVELR

## PL400S

- › 400a Powerlock Inlet
- › 2x 400a Powerlock Out with individual 400a breaker + SVELR
- › Overall Multifunction Meter

## PL600

- › 3x 400a Powerlock Inlet
- › 6x 32/3 outlet with fixed RCD (100mA) and MCB
- › 3x 63/3 outlet with MCB / SVELR
- › 3x 125/3 outlet with MCB / SVELR
- › One Powerlock outlet with MCB / SVELR
- › Overall Multifunction Meter

# CABLE RENTAL

---

We have large quantities of electrical extension cables and adaptors in single phase and three phase. These are available in a range of lengths from 3 - 50 metres, although we do keep a small stock of 75m 32a three phase. Other cables/lengths can be manufactured upon request.

## 16AMP 230V EXTENSION CABLE

# LIGHTING HIRE

---

LED Lighting offers a highly efficient alternative to the sodium and metal halide fixtures available.

## LED FLOOD

.....

- › We have a variety of LED Floods all with a 16amp 230v plug inlet.
- › 10w · 20w · 50w  
100w · 200w

## FESTOON

.....

- › We keep stock of 1m/s and 3m/s festoon lighting that is supplied with 5w LED golf ball lamps.
- › 25m · 50m · 100m

## HIGH BAY LED'S

.....

- › Our LED fixtures include our 150W High Bay fixtures
- › 16amp T-Line Connection
- › 5000k Balanced Light Output
- › 385mm Diameter x 185mm High and Weigh 5kg

## EMERGENCY LIGHTING OPTIONS

## TWIN SPOT (FROG EYES)

.....

- › Non Maintained Bulkhead Fixture
- › 2x 3kW Spots
- › 3hr Running Time

## RUNNING MAN BULKHEAD

.....

- › Maintained Fixture
- › 352 x 117 x 76mm
- › 3hr Running Time

## RUNNING MAN LARGE SIGN

.....

- › Maintained Fixture
- › 620 x 455 x 80mm
- › 80m Viewing Distance
- › 3 hour Running Time

# CABLE RAMPS

---

We boast bulk quantities of 5 channel cable ramp sourced from Adam Hall and Ten47. This is available in black with yellow or red lids. The heavy duty rubber end mouldings interlink to provide continuous cable protection.

**ADAM HALL  
DEFENDER MIDI**

.....

**TEN47 CABLEGUARD

# ACCESSORIES

---

## MOTOROLA DP4400 2WAY RADIOS

.....

- › Portable Design
- › Unrivalled Voice Communications
- › 16 Channels
- › Programmable Buttons
- › User Friendly
- › IP57 Specification
- › 130 x 55 40mm

## FORKLIFT PERSONNEL ACCESS CAGE

.....

- › IAP-6 Forklift Access Platform
- › We stock this foldable access platform which is ideal for high level access using a forklift truck or telehandler.
- › Suitable for Two Persons
- › Built in Accordance with HSE regulation
- › Lift-Up Bar Access
- › Safety Harness Attachment Rings
- › Zinc Plated Heel Pins
- › Capacity = 250kg
- › Platform Base = 950 x 950 x 2120mm
- › Weight = 102kg
- › Supplied with LOLER certificate

# TESTIMONIALS

---

**“PROJECT POWER WORKED TIRELESSLY ACROSS THE SUMMER** to help deliver 8 Pub in the Park events as part of our 2019 summer tour. Offering a full management service including fuel management, site lighting, onsite project support and exhibitor management. Tailoring the offering to meet individual venue needs and having a highly efficient team delivering the service on the ground.”

**OPERATIONS MANAGER | BRAND EVENTS**

---

**“WE HAVE WORKED WITH PROJECT POWER FOR A NUMBER OF YEARS NOW** and produced a number of successful shows together. The team always come prepared with additional kit and are happy to go above and beyond to help us make things work! Their rates are competitive without skimping on quality and they assign our project managers based on the needs and complexities of our shows.”

**HEAD OF PRODUCTION | WE ARE THE FAIR**

---

**“SME LONDON HAS WORKED WITH PROJECT POWER, FORMALLY KNOWN AS SWG POWER, FOR THE LAST 4 YEARS ON BBC COUNTRYFILE LIVE.** With over 700 traders in Year 1, they were integral the success of the show in terms of exhibitor management. Now with over 1,500 exhibitors across the two events we rely on Project Power to deliver a consistently good product at a competitive price. They have also now expanded their generator fleet to include some of the most state of the art hybrid generators within our events.

When it comes to the exhibitors experience with the power team we get better and better feedback each year. That is down to the willingness of Tom Wild and his team. Whilst their management of the exhibitors and customer service is second to none, Project Power always has SME's (the client's) best interests at heart. This is reflective in their competitive pricing and considerate advice when planning our floor plans.

They will always go the extra mile (and then some!) to ensure we are happy with the finished product, nothing is ever too much trouble. This makes them integral to the success of the event and is why we'd always recommend them for future projects.”

**OPERATIONS MANAGER | SME LONDON**

# TOWING

## BY PROJECT POWER

**3.5TKG TOWING CAPACITY ON ALL VEHICLES**

**VEHICLES RUNNING UNDER TACHOGRAPH  
AND TRACKED**

**7TKG TRAIN WEIGHT PANEL VAN OPTION**
